1'373, is hereby amended to read as follows:

SECTION 4. No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes, if it appears likely in the opinion of the Superintendent that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming his opinion as to the acceptability of these wastes, the Superintendent will give consideration to materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substances, materials, waters and wastes which may be prohibited hereunder shall include, but not be limited to, the following:

(a) Any liquid or vapor having a temperature higher than one hundred and fifty degrees (150°) Fahrenheit (Sixty-five [65] degrees Centigrade).

(b) Any water or wastes containing fats, wax, grease, or oils, whether emulsified or not, in excess of one hundred (100) mg/l or containing substances which may solidify or become viscous at temperatures between thirty-two (32) and one hundred fifty degrees (150°) Fahrenheit (Zero [0] and Sixty-five [65] degrees Centigrade).

(c) Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor of one (1) horse-
power (1 hp metric) or greater shall be subject to the review and approval of the Superintendent.

(d) Any waters or wastes having a pH in excess of 10.0.

(e) Materials which exert or cause:

(1) Unusual concentrations of inert suspended solids (such as, but not limited to, Fullers earth, lime slurries, and lime residues) or dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).

(2) Excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions).

(3) Unusual BOD, chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.

(4) Unusual volume of flow or concentration of wastes constituting "slugs" as defined herein.

(f) Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

SECTION 2. This ordinance being necessary for the protection of the public health and welfare, shall be in full force and effect from and after its passage, approval, recording, and publication as provided by law.
