RESOLUTION

WHEREAS, the Department of the Army Corps of Engineers, hereinafter referred to as the Corps, has heretofore constructed on the Arkansas River south of Cadron Creek in the vicinity of the Toad Suck Ferry Landing, a structure commonly known as Lock and Dam #8, and

WHEREAS, construction of said Lock and Dam #8, has caused the normal pool elevation of the Arkansas River in the vicinity of the Cadron Creek to be approximately 265 feet above mean sea level, and

WHEREAS, prior to the raising of the normal pool elevation of the Arkansas River the Corps constructed a gated weir on the Cadron Creek approximately two miles above its confluence with the Arkansas River, and

WHEREAS, said Cadron Creek Weir has a crest elevation of 266.5 feet above mean sea level and was constructed for the purpose of separating the waters of the Cadron Creek and the Arkansas River to provide a measure of protection for the raw water supply of the City of Conway from intrusion by the polluted and contaminated waters of the Arkansas River, and

WHEREAS, construction of said Cadron Creek Weir caused a lake to be formed in the lower reaches of Cadron Creek, subjecting the City of Conway to certain regulations of the Arkansas State Health Department which requires the City of Conway to own a 300 ft. barrier strip of land around said lake, and

WHEREAS, the formation of said Cadron Creek Lake has caused vast areas within this impoundment to be flooded, at depths of 18 inches or less, creating conditions that promote massive growth of undesirable algae, and

WHEREAS, formation of said impoundment has caused the manganese content of the water to rise appreciably above the allowable amount, and

WHEREAS, the above mentioned manganese content and excessive algae growth, overbloom and kill has caused the City of Conway to invest large sums of money in additional water treatment equipment to cope with the now existing poor creek water conditions, thereby excessively increasing the cost of treating the water of said creek, and

WHEREAS, the raising of the water level in Cadron Creek has denied the City of Conway the benefits of the Beaverfork Reservoir as it has been used in years past to flush poor quality water from the creek, and

WHEREAS, this totally deplorable condition created by the Corps and imposed upon the City of Conway is expected to become and is becoming more undesirable each year, and

WHEREAS, the City of Conway, realizing that the Corps has caused Cadron Creek to no longer be an acceptable raw water source, conducted a study to determine if an acceptable alternative raw water supply could be located, and

WHEREAS, said study revealed that a structure on Cypress Creek approximately two and one half miles above its confluence with the north Cadron Creek together with a pipe line and pumping facility as shown by a survey, and preliminary study made by Marion L. Crist, Associates Engineering Firm would provide a reasonable if not totally acceptable substitute raw water facility, now

THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF CONWAY, ARKANSAS:

That, the U.S. Army Corps of Engineers is hereby requested to provide, at its sole expense, the substitute facility outlined in the aforementioned preliminary report prepared by the Marion L. Crist & Associates, Inc., and the City of Conway, Arkansas will accept said substitute facility as reasonable compensation for damages done to it by the Corps of Engineers construction of said Lock & Dam #8.
