

RESOLUTION NO. R-76- 10

WHEREAS, a bad traffic situation presently exists on Highway 60 near the present Conway Middle School and Conway High School endangering the safety of our students; and

WHEREAS, large trucks create problems in the central business district in their current usage of Highway 60; and

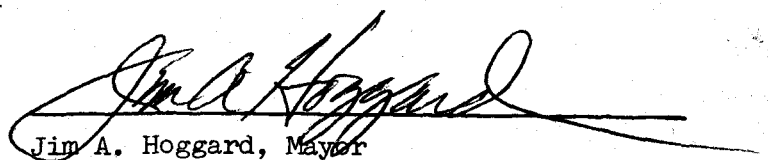

WHEREAS, there is a tremendous residential growth in western Conway creating a situation where most of these people use Highway 60 to reach Interstate 40; and

WHEREAS, the City Council recognizes the tremendous need for a western north-south route in Conway connecting Highway 286 and the present Highway 60; and

WHEREAS, Salem Road is a part of the City's Federal Aid Urban System.

BE IT HEREBY RESOLVED, that the City Council requests the State Highway Department to construct a new Highway 60 from the present intersection of Highway 60 and Salem Road south to a point on Highway 286. We also request a thorough study of the feasibility of the extension of this Highway northward on Salem Road from the present intersection with Highway 60 to Meadowlake Road and east on Meadowlake Road to an intersection with Interstate 40 relieving a tremendous number of traffic problems in western Conway. It is further understood that this total project would mean the abandonment of the present route of Highway 60 east from Salem Road to Harkrider Street.

APPROVED:

Jim A. Hoggard, Mayor

ATTEST:

Doris Nunn, Clerk-Treasurer
