By reducing lot size to 100’ minimum lot depth/6000 square feet, more lots can be fit into a typical subdivision, and the costs savings for the developer can be passed on to home buyers, creating more affordable homes. Also, due to the reduction in lot size, raising the lot coverage requirement from 35% to 40% would enable houses with more square footage. Mr. Patrick also added that he would like to see an addition to the Ordinance stating that in the case of corner lots, the lot depth remain 100’ even though the width requirement is 75’ in accordance with the Subdivision Ordinance. Mayor Castleberry stated to the Council that Conway Corp had been consulted and it was determined that the change in lot size would not affect utility easements or present any type of problem for them. He advised the Council that if the rezoning is approved that they require all the scrutiny that the present drainage ordinance allows.
