SUBDIVISION COMMITTEE WILL MEET
@ 6:00 pm in the City Hall Downstairs Conference Room

Call to Order

Introduction & Chairperson Remarks

Minutes: September 19, 2016

1. Subdivision and Replat
   A. Carmichael Place Subdivision, Preliminary
   B. Salem Woods Phase 3, Preliminary
   C. The Orchard at Round Mountain, Sidewalk in lieu of variance request

2. Public Hearings*
   A. Priest Request to Amend Conditional Use Permit No. 1353
   B. Goode Request to Rezone: I-3 to C-3
   C. Quality Design Construction Request to Rezone: A-1 to I-1
   D. Bruning Request for Conditional Use Permit

3. Discussion
   A. 2017 Planning Commission Nomination Schedule
   B. Items as decided by the Planning Commission

Adjourn

Planning Staff Development Review/Minor Subdivision Reports to the Planning Commission

The following items have been reviewed and approved by the Director of Planning and Development and are being reported to the Planning Commission as required by the Zoning and Subdivision Ordinances:

A. Development Reviews
   • Village Commons Duplexes, 1830 Village Commons Drive
   • St. Joseph South Parking Lot, 415 Harkrider Street

B. Lot Splits, Lot Mergers, and Minor Subdivisions (filed for record)
   • South CBC Subdivision - extension granted until 10/2/2017
   • Laney Subdivision, Block 2 "Davids Replat" [L-302]
   • Holland Subdivision [L-301]

*The Conway Planning Commission makes recommendations to the City Council on public hearing items. The City Council will make a final decision on these items using the Planning Commission recommendations as a guide.

Items reviewed at tonight's Planning Commission meeting may be considered by the City Council as early as October 25, 2016.

Items not approved by the Planning Commission may be appealed to the City Council within 30 days after Planning Commission denial. If an item is appealed to the City Council, a public notice sign will be placed on the property at least 7 days prior to the City Council meeting. A public notice will be placed on the City’s website: www.cityofconway.org.
CARMICHAEL PLACE PRELIMINARY SUBDIVISION

APPLICANT
Jim Hawks
Hawks Investment Co
2111 E German Lane
Conway, AR 72032

STAFF REVIEW BY
Scott Grummer, City Planner
1201 Oak Street
Conway, AR 72032

SITE DATA
Location. Property located on Salem Road north of Smoking Oaks Road and south of Tucker Creek Road

Site Area. 5.04 acres +/-

Current Zoning. R-1 (One Family Residential)

Existing Structures. 1 existing single family home and one accessory building.

Overlay. None

STAFF COMMENTS
This subdivision is a 5 acre single family residential infill development. There are 4 items needing Planning Commission approval. A variance request has been made to not require the new street to connect with Forrest Lane which is stubbed to the south property line. The developer would instead like to construct a cul-de-sac. Additional connectivity from the new subdivision and Smoking Oaks Subdivision is desirable. Therefore, Planning Staff is not in favor of granting this variance. If the Planning Commission grants the variance to allow a cul-de-sac, then a constructed 5 foot sidewalk, on a pedestrian easement should be required between the cul-de-sac and Forrest Lane. Planning Staff sees no problem with the requested variances for slightly reduced lot sizes and corner radii.

STAFF RECOMMENDATIONS
Planning Commission approval is needed for items 7, 8, 9, and 13. Staff recommends approval of the subdivision with the above concerns addressed.

CONWAY CITY PLANNING DEPARTMENT REVIEW
CARMICHAEL PLACE SUBDIVISION
SUBMITTED BY: JIM HAWKS

This review lists the changes and/or additions as required by the Conway Subdivision Ordinance for preliminary plat approval.

BASIC INFORMATION NEEDED ON THE PLAT
1. A legal description of the property with exact boundary lines, bearings and distances is needed. Boundary Corners need to be marked on the map.

2. For subdivisions of ten (10) acres or less in size, no new CAGIS monumentation is required. However, these smaller subdivisions must all be tied to CAGIS monumentation.

ADDITIONAL INFORMATION NEEDED, BUT NOT ON THE PLAT
3. Improvement plans for each new utility system are needed.
4. Improvement plans, including typical cross sections and centerline profiles for any new street system, are needed.
5. Improvement plans for any new drainage system, including location, size and construction of drainageways and structures and typical cross sections and centerline profiles are needed.
6. The Certificate of Preliminary Engineering Accuracy is needed on each set of street and drainage plans.

STREET DESIGN REQUIREMENTS
7. Proper access in the form of stub streets or temporary dead end streets shall be provided to adjacent unplatted property unless, in the judgment of the Planning Commission, topographic conditions or physical constraints preclude reasonable provision of such access or alternate routes are or will be available in the future. A variance request has been received to allow a Cul-de-sac in lieu of connecting to the Forrest Lane Stub out. The Planning Commission must approve this request or this condition must be corrected.

SIDEWALK DESIGN REQUIREMENTS
8. Cul-de-sac streets tend to reduce the number of connections and choices available for people traveling by automobile and increase congestion on other streets. Where cul-de-sacs are utilized, pedestrian and bicycle pathways to allow linkages with like abutting properties and the street system may be provided. Construction standards for the pedestrian and bicycle pathways shall be the same as for sidewalks. For instance, pathways could be provided linking the backs of lots fronting on the termination of cul-de-sacs and providing access to sidewalks along through streets. If Forrest Lane is not extended into the development, then a pedestrian pathway easement between lots 9 & 10, extending to the Forrest Lane stub out, is recommended by staff for approval by the Planning Commission.

LOT DESIGN REQUIREMENT
9. Cul-de-sac turnarounds shall have a right-of-way diameter of 120 feet and a pavement diameter of 96 feet. Measurements assume back of curb to back of curb for a roll curb. A variance request has been received for a reduced radius of 50’ ROW. The Planning Commission must approve this request or this condition must be corrected.

10. Where residential streets intersect other residential, collector or arterial streets, the curb radii at the intersection shall not be less than 28 feet.

EASEMENT DESIGN REQUIREMENTS
11. Utility easements as required by Conway Corporation are needed.
12. Drainage easements as required by the City Engineer are needed.
18. Garage Elevation. The elevation of the garage or carport will need to be established to allow for the transition of the driveway from the street curb to the sidewalk, and from the sidewalk to the garage without adversely affecting the required 2% cross-slope of the sidewalk. Add this to the Sidewalk Notes.

OTHER REQUIREMENTS
19. In addition to the requirements established herein, all subdivision plats shall comply with all other applicable rules, regulations and laws including but not limited to the Growth Plan (Comprehensive Plan), the Conway Zoning Ordinance, building and housing codes, and any other regulations adopted by the City Council and any regulations or special requirements of the State Health Department, State Highway & Transportation Department, or other appropriate State agencies.

AUTHORIZATION TO PROCEED
20. Receipt of an approved or conditionally approved copy of the Preliminary Plat, together with an approved copy of the Improvements Plan shall constitute authorization of the Planning Commission for the developer to proceed with the preparation of the Final Plat, the installation of improvements, and the staking out of lots and blocks. The developer, after conditional approval of the Preliminary Plat, shall complete all improvements required under this regulation.

EXPIRATION OF PLAT
21. Plats will expire at the end of one year from acceptance of the Preliminary Plat unless an extension is requested and granted by the Planning Commission. The Carmichael Place Subdivision will expire on 09/30/2017.

Preliminary Plat

Staff Review by
Scott Grummer, City Planner
1201 Oak Street
Conway, AR 72032

Site Data
Location: Property located at south of Pulaski Drive
Site Area: 21.99 acres +/-
Current Zoning: R-1 (One Family Residential)
Existing Structures: None
Overlay: None

Staff Comments
Planning Staff sees no problems with this single family residential subdivision as submitted.

Staff Recommendations
Staff recommends approval of the preliminary plat subject to the completion of the punch list.

Conway City Planning Department Review
Salem Woods Phase 2 Preliminary Plat
Submitted By: Hal Crafton

This review lists the changes and/or additions as required by the Conway Subdivision Ordinance for preliminary plat approval.

Basic Information Needed on the Plat
1. Certificate of Owner Title needs to be placed over the owner information.

General Design Requirements
2. Preliminary Plat approval subject to review and approval by Street Dept. of submitted Drainage and Street Improvement Plans.

Access Design Requirements
3. The maximum number of single family and two family residential units served by a single access shall be thirty (30). For more than thirty (30) living units, there shall be no fewer than two (2) separate and approved fire apparatus access roads. These two access roads shall be placed a distance apart equal to not less than one half of the length of the maximum overall diagonal dimension of the property or area to be served, measured in a straight line between accesses. For more than two hundred (200) living units, three (3) access routes must be provided. Two access roads must meet the above separation requirements, the third access must be no less than 200 feet from any other access, measured from centerline to centerline of street right-of-ways.

Street Design Requirements
4. Cul-de-sac turnarounds shall have a right-of-way diameter of 120 feet and a pavement diameter of 96 feet. Measurements assume back of curb to back of curb for a roll curb.

Easement Design Requirements
5. Utility easements as required by Conway Corporation are needed.
6. Drainage easements as required by the City Engineer are needed.

Utility Design Requirements
7. Fire hydrants must be placed so that the furthest point of a lot in a residential subdivision is no more than 600 feet from the hydrant located on the same street. Variances must be approved by the Planning Commission and Fire Chief.

Sidewalk Design Requirements
8. Sidewalk are required along both sides of all streets. The existing sidewalks must be shown.

Fee Requirements
9. Appropriate fees must be paid. Please remit $30 to the City of Conway for Engineering Fee balance owed.

Other Requirements
10. In addition to the requirements established herein, all subdivision plats shall comply with all other applicable rules, regulations and laws including but not limited to the Growth Plan (Comprehensive Plan), the Conway Zoning Ordinance, building and housing codes, and any other regulations adopted by the City Council and any regulations or special requirements of the State Health Department, State Highway & Transportation Department, or other appropriate State agencies.

Authorization to Proceed
11. Receipt of an approved or conditionally approved copy of the Preliminary Plat, together with an approved copy of the Improvements Plan shall constitute authorization of the Planning Commission for the developer to proceed with the preparation of the Final Plat, the installation of improvements, and the staking out of lots and blocks. The developer, after conditional approval of the Preliminary Plat, shall complete all improvements required under this regulation.

Expiration of Plat
12. Plats will expire at the end of one year from acceptance of the Preliminary Plat unless an extension is requested and granted by the Planning Commission. The Salem Woods Phase II will expire on 09/30/2017.
THE ORCHARD AT ROUND MOUNTAIN VARIANCE REQUEST TO PAY IN LIEU OF SIDEWALKS

APPLICANT
Central Arkansas Professional Surveying
1021 Front Street
Conway, AR 72032

OWNER
Hal Crafton
Rush-Hal Development
3200 Tyler Street, #A
Conway, AR 72034

STAFF REVIEW BY
Scott Grummer, City Planner
1201 Oak Street
Conway, AR 72032

SITE DATA
Location. Property located off Mill Pond Road on a portion of the former Collins Round Mountain Orchard.

Site Area. 5.9 acres +/-

Current Zoning. R-1 (One Family Residential)

Existing Structures. A handful of single-family homes are under construction.

Overlay. None

STAFF COMMENTS
This subdivision was approved in March 2015. Sidewalks were required as part of the approved plat. The developer would like to remove the sidewalk construction requirement and pay in-lieu fee instead.

STAFF RECOMMENDATIONS
Planning Commission approval is needed to remove the sidewalk construction requirement as noted on the plat. The street has open ditches which cause a technically difficult situation for sidewalk construction. Other factors the Planning Commission should consider include:

- Pedestrian traffic generators
- The existence of an area sidewalk network
- The density of area development
- The amount of pedestrian traffic
- Terrain and other physical difficulties

Based on the above factors, Planning Staff recommend approval of the removal of the sidewalk requirement as platted. An in-lieu fee of $24,375 will be added to the general sidewalk fund.

This review lists the changes and/or additions as required by the Conway Subdivision Ordinance for approval of the requested variance after preliminary plat approval has already been granted.

SIDEWALK DESIGN REQUIREMENTS
1. Sidewalks are required along both sides of all streets within all zoning districts within Conway city limits and within the Conway Territorial Jurisdiction.
2. Any developer required sidewalk shall be constructed concurrently with other subdivision infrastructure. Such construction shall be completed or assurance for construction shall be required along with other infrastructure improvements prior to filing of the final plat.
GOODE REQUEST TO REZONE PROPERTY AT 1310 EAST DAVE WARD DRIVE FROM I-3 TO C-3

APPLICANT/OWNER
Grant Goode, representative for Dwayne & Elaine
1 Eaglewoving Drive
Conway, AR 72032

STAFF REVIEW BY
Jason Lyon, Asst. Director of Planning and Development
1201 Oak Street
Conway, AR 72032

SITE DATA
Location. 1310-1450 E Dave Ward Drive
Site Area. 24.47 acres +/-
Current Zoning. I-3 (Intensive Industrial District)
Requested Zoning. C-3 (Highway Service and Open Display District)
Existing Structures. Mobile Home Sales units, temporary office buildings across property, no permanent foundations
Overlay. None.

Comprehensive Plan. The Comprehensive Plan shows this area as a transition zone with a transition from commercial frontage on Dave Ward Drive to industrial as one moves away from street frontal and single family to the east of the property.

Projected Traffic Impact. With the proposed C-3 zoning, there would be an expected jump in traffic. The area in question has rapidly changed to commercial over the past 2 years with 2 other rezoning requests approved in 2014 and 2015 to C-3 from industrial zones. The applicant has not given details on project proposals, but timeline of growth would be extended out 5 years due to current ground leases in place. With Lewis Crossing opening across Dave Ward and the proposed Lewis Ranch Development, traffic in the area will already be high and a rezoning to commercial would only add to the traffic that will already be in place. Assuming a retail shopping center of 300,000 sq. ft. traffic could be as high as 12,000 car trips a day, but note this traffic could be spread across the shopping centers existing in the immediate area.

Street Improvements. East Dave Ward Drive is currently under construction to be widened from I-40 to eventually South East German Lane. There is no known timeline as to when the extension to South East German Lane will be finished, currently the widening stops in front of this property.

Conway 2025. Commercial corridor continues to build and bring in new development but this area is not directly written about in the 2025 plan.

STAFF RECOMMENDATIONS
Planning Staff recommends approval of this request, the area is transitioning to a commercial sector, but the eastern edge of property would be the appropriate tipping point for commercial expansion. There is office to the east and property on the south side of East Dave Ward is outside the city and not zoned, currently. Traffic concerns and infrastructure will need to be addressed as the development master plan is brought forward for further review. Further studies of this corridor will also be needed for a smart growth plan that allows a buffer between commercial and the residential-agricultural component located to the north and east of the proposed rezoning.
QUALITY DESIGN CONSTRUCTION REQUEST TO REZONE: A-1 TO I-1

QUALITY DESIGN CONSTRUCTION, INC.
REQUEST TO REZONE PROPERTY LOCATED AT 1182 LOLLIE ROAD FROM A-1 TO I-1

APPLICANT/OWNER
Mark Ladd
Quality Design Construction
1182 Lollie Rd
Conway, AR 72034

STAFF REVIEW BY
Jason Lyon, Assistant Director of Planning & Development
1201 Oak Street
Conway, AR 72032

SITE DATA
Location. 1182 Lollie Rd

Site Area. 1.81 acres +/-; 1.38 +/- developable area due to ROW dedication needed upon expansion and platting of the property

Current Zoning. A-1 (Agricultural District) Note: Current use is a preexisting non-conforming (grandfathered) use. The property was annexed into the City, in February 2009 as part of the Lollie Bottoms (new airport) Annexation.

Requested Zoning. A-1 (Agricultural District) to I-1(Intermediate Industrial District)

Existing Structures. Cabinet Shop at 1182 Lollie Road

Overlay. None

Comprehensive Plan. The Comprehensive Plan shows this area as single family. Cooper Lane is all larger lot residential, surrounding area is relatively undeveloped land in the County.

Projected Traffic Impact. The requested rezoning would have a minor impact on traffic as the existing use would continue. An expansion is planned creating a slight increase in traffic. With a rezoning to I-1, a worst case scenario for traffic generation would be a hotel/motel. However, due to the size of lot and lack of public sewer, this would not be feasible.

Flood/Drainage. There is no flood plain located on the property as it sits on a higher point as the land slopes south into the Lollie Bottoms.

Utility Infrastructure. Developers of the property should coordinate with Conway Corporation on utility upgrades needed for development on the property and Fire Department regarding fire hydrant location and needs. There is a fire hydrant located on the property in the Southwest corner (M2682).

Street Improvement. There are currently no known plans for upgrades to Lollie Road in this section, although with the opening of the airport and Tupelo Bayou Wastewater Treatment Facility, traffic has increased on this stretch of roadway.

Conway 2025. Not applicable.

STAFF COMMENTS
The applicant is seeking a rezoning from A-1 (Agricultural District) to I-1(Intermediate Industrial District) with plans to expand existing structure and add a showroom. The small size of the property prohibits any type of large scale development and it is not likely that the owner will tear down and rebuild existing structures. The traffic generated should be manageable, even with the planned expansion. The traffic count should only slightly increase.

STAFF RECOMMENDATIONS
Planning Staff recommends approval of this request, as an I-1 zoning would bring the property into zoning compliance with its current use as a cabinet shop. The small size of the property and the improbability of the applicant rebuilding means overall impact of the new zoning would be very small with regards to traffic or neighborhood property impact.
PRIEST REQUEST TO AMEND CONDITIONAL USE PERMIT NO. 1353, ALLOWING RESTRICTED OFFICE FOR PRIVATE COUNSELING PRACTICE, FOR PROPERTY LOCATED AT 1312 DONAGHEY AVENUE

OWNER
Ayisha Canant

APPLICANT
Jon Priest
3185 Cleburne Cove
Conway, AR 72034

STAFF REVIEW BY
Jason Lyon, Asst. Director of Planning and Development
1201 Oak St
Conway, AR 72032

SITE DATA
Location. 1312 Donaghey Ave
Site Area. 0.28 acres +/-

Current Zoning. R-2A (Two Family Residential District); Conditional Use Permit Allowing Restricted Office (#1353)

Requested Conditional Use Permit. Restricted Office in Residential

Existing Structures. Single Family home currently used as counseling office and accessory buildings

Overlay. Old Conway Design Overlay District

Comprehensive Plan. The Comprehensive Plan shows this property as appropriate for single family residential.

Projected Traffic Impact. A one-person counseling office should be a very low traffic generator. Any additional employees would also have an impact. Assuming 5 patients per day and one employee, an additional 14 vehicle trips per day could be expected in addition to the typical 10 single-family vehicle trips.

Utility Infrastructure. There are existing utilities at the property for the current use.

Flood/Drainage. The property is not within any flood plain.

Street Improvements. There are no area street improvements planned in the near future.

Conway 2025. Not directly applicable.

STAFF COMMENTS
The applicant is requesting a conditional use permit to allow a restricted office.

There is an existing conditional use for the same service. Therefore, staff recommends amending conditional use permit #1353 to allow the new tenant to provide the same mental health services under the restricted office use.

A restricted office as defined by the Zoning Ordinance must meet the following criteria:

A conditional use may be granted to allow the conversion of older structures within residential districts that are no longer useful, serviceable, or desirable in their present use to Restricted Office use. Such offices will have minimal to no negative impact on the residential areas.

The following conditions are required:
1. Hours of operation: Appropriate hours of operation must be determined.
2. Signage: Wall signage shall be limited to a non-illuminated faceplate attached to the structure no greater than 2 square feet in area. Freestanding signage shall be a non-illuminated monument or two pole sign no greater than 4 feet in height and 4 feet wide. A non-illuminated post and arm sign as defined by Conway sign regulations, may be substituted for a monument or two pole sign. No banners shall be permitted.
3. Architectural Compatibility: Any remodeling or new construction must be compatible with the surrounding architecture.

Planning Commission Staff Report • October 2016
4. Within the Old Conway Design Overlay District, the Historic District Commission shall review and decide compatibility. This review shall include overall exterior appearance, materials, setbacks, height, lot coverage, etc. The setbacks, height, and lot coverage restrictions will be no greater than allowed by the lot regulations per zone, overlay, or historic district.

5. Term of the Conditional Use: Conditions are limited to the applicant. If the property is sold, the conditional use shall be void.

6. Lighting, parking, screening/buffering shall minimally match Conway Development Review Standards. Additional parking and/or screening/buffering requirements may be recommended by the Planning Commission and required by the City Council including, but not limited to, parking location and design, fencing or landscaping as required to provide an adequate buffer for neighboring properties.

7. Sidewalks: Construction and or repair of existing sidewalks, if necessary, is required as per Conway Development Review Standards.

These conditions are to ensure the compatibility of the office use with any adjacent residential use. The above conditions may be amended by the Planning Commission/City Council for the most appropriate use.

The applicant intends to move his consulting office to this location. Currently, Ms. Ayisha Miller has been operating a consulting office at the location since February 2015. The Donaghey Avenue Corridor Study examined Donaghey from Prince Street south to Dave Ward Drive. The study recommended that residences no longer viable for residential use be allowed to repurpose to office or commercial uses through the conditional use process. The home is within the Old Conway Design Overlay District. Although the applicant is not planning an addition to the residence, additions in the Old Conway area require Historic District Commission approval.

**STAFF RECOMMENDATIONS**

Planning Staff recommends approval of this conditional use permit with appropriate conditions. There have been no issues with Ms. Ayisha Miller, the current holder of the conditional use permit since February 2015.

**Recommended Conditions: Taken and Amended from Conditional Use Permit #1353**

**CONDITIONS ATTACHED TO PERMIT #1353:**

1. Hours of operation will be limited to 7:00 am to 7:00 pm, Monday through Friday.
2. The total number of employees may not exceed four (4).
3. The Conditional Use Permit is limited to Ayisha (Miller) Canant and/or Jon Priest/Christian Perspective Counseling.
4. The existing structure shall be used for the restricted office. The character of the structure shall remain residential.
5. Parking is limited to the existing driveway and the rear of the structure.
6. Signage shall be a Post and Arm sign OR two-pole sign limited to 4 feet in height and no larger 16 square feet in area AND meets Old Conway Design Overlay District guidelines pursuant to freestanding signs. Limited to a 4-foot by 4-foot, non-illuminated sign attached to the structure as defined by the Conway Sign Ordinance (O-96-60). No freestanding signage or banners may be used. No additional signage is allowed.
Existing Structures. Several metal buildings, concrete parking areas, and storage tanks.

Overlay. None

Comprehensive Plan. The Comprehensive Plan shows this area as appropriate for single family residential. However, the property is outside the City limits and has commercial activity adjacent to the west. Rolling Hills single family residential subdivision is abutting on the south.

Projected Traffic Impact. A church would have minimal traffic generation other than peak worship times. The truck chassis assembly and environmental services businesses would generate mostly employee traffic. The property abuts a major 4 lane highway with a center turn lane. The proposed uses should not create an undue burden on area traffic movement.

Utility Infrastructure. Electricity is served by Entergy. Water is served by Beaverfork Water. There is no public sewer. Private septic systems are used. Private sanitation companies service trash pickup.

Flood/Drainage. There is no flood plain or flood way located on the property. Planning is unaware of any substantial drainage problems.

Street Improvements. There are currently no known plans for upgrades to Highway 65.

Conway 2025. Not applicable.

STAFF COMMENTS
The property is outside the city limits but within Conway’s Territorial Jurisdiction. By Arkansas state law, Conway may zone within its territory up to one mile outside the city limits. In 2011, a new zone named TJ (Territorial Jurisdiction) zoning was created in response to the gas drilling industry and Frac Tech in particular. The south property line of this property is the city limit. Rolling Hills and Thousand Oaks Subdivisions are abutting on the south. While Frac Tech was in business, there were complaints from the adjacent residential areas including; noise, lights, and a truck wash out adjacent to residential lots. Frac Tech also ran 24/7. At the time, there was no City control of the land use on the Frac Tech property. In response, the City extended zoning to control redevelopment of the property. In the TJ zone, pre-existing businesses may continue to operate without any action from the
city. Once a business closes, the new business must seek a conditional use permit to allow re-opening. Frac Tech has been closed since 2010.

The applicant is seeking a conditional use permit to allow 3 uses at this location: a church; Altec, a bucket truck chassis assembly company; and Momar Ramco, an environmental service facility. These 3 businesses would occupy and use lease areas as shown on the submitted lease area map.

**Church.** Prior to Frac Tech, the metal building resembling a church was constructed and used by Calvary Baptist Church. There is ample paved parking. A church use of the property should be quiet and non-intrusive to the abutting neighborhood.

**Bucket Truck Assembly.** Altec, the bucket truck assembly company receives commercial truck chassis without a bed and adds a bucket truck assemblies to finish the truck. The submitted lease area map shows them operating from two existing buildings in the middle portion of the property.

**Environmental Services.** Momar Ramco specializes in application services, including dust control, soil retention, erosion control, and revegetation. They provide on-site assessment, consultation, and product application. It is assumed that the company will have several spray trucks, supporting equipment, and loading tanks. The submitted lease area map shows them operating from 2 existing buildings and a possible new building in the south, mid, and east portion of the property.

**STAFF RECOMMENDATIONS**

Planning Staff recommends approval of this request with appropriate conditions that may the requested uses most compatible with the abutting residential neighborhood.

Recommended Conditions:
1. Hours of operation for commercial businesses
2. Lighting must be inward, downward, and shrouded with cut off fixtures meeting development review standards. No lights shall intrude on abutting residential property
3. Uses are limited to those requested; church, bucket truck assembly, and environmental services
4. Allowed uses shall be in specified areas as shown on submitted lease area map
5. Church and businesses entities may change, however allowed uses may not
6. No external sound system
7. Dust control measures shall be used to lessen air borne dust from gravel parking area
Proposed Schedule for the Nomination of 2017 Planning Commission Members

Two new members will be needed in 2017 to fill Mark Lewis and Matthew Brown’s positions, whose terms are expiring. The two new 5 year terms will expire in 2021.

City wide representation is a desirable trait of the Planning Commission. Not including the two outgoing members, the Planning Commission consists of:

Ward 1: 1 member
Ward 2: 3 members
Ward 3: 2 members
Ward 4: 2 members

Mark Lewis resides in Ward 3 and Matthew Brown in Ward 1. Ideally, the new members would represent a combination of Wards 1, 3 and/or 4.

The nomination schedule below shows a window for nominee interviews and selection available between November 1 and November 18, 2016.
