Re: Traffic Signal Upgrade Request
State Highway 365 (Harkrider) @ Bruce Street and Robins Street
Conway, AR

Dear Mr. Vozel,

The signal poles at both of the above referenced intersections are beginning to show their age. The old wooden poles at these locations are leaning at an increasing rate, which requires our technician to remove slack from the strand-mount signals on a regular basis to provide ample clearance from the traffic below. The vicinity of these poles to the railroad precludes the addition of guy wires or additional support poles. I am writing to request AHTD assistance in upgrading these signal poles to current standard.

Sincerely,

Tab Townsell
Mayor
